JAIVIN A

Full Stack Developer

Avadi, Chennai | +91 9566920937 | jaijaivin2004@gmail.com

Profile Summary

Computer Science undergraduate with a strong foundation in Full Stack Development, UI/UX design, and front-end fundamentals. Proficient in Figma for wireframing, prototyping, and developer handoff, complemented by hands-on experience in HTML, CSS, JavaScript, and Python-based application development. Skilled at translating user needs into clean, functional interfaces and eager to contribute full stack solutions to real-world products as a Full Stack Developer fresher.

Core Skills

UI/UX Design: Figma, Wireframing, Prototyping, Responsive UI Design
Programming Skills: HTML, CSS, JavaScript (basics), Python
Databases: MySQL, PostgreSQL, MongoDB
Backend: Node.js, Express.js, REST APIs, Authentication (JWT, OAuth), API Development
AI & Productivity: Prompt Engineering, GitHub Copilot, ChatGPT

Education

Sriram polytechnic College — Tiruvallur
Diploma, Computer Science and Engineering — *7.1*

Sriram Engineering College — Tiruvallur
BE, Computer Science and Engineering — *7.9*

Relevant Experience

Kenmac Corporate Limited — Chennai
Full Stack & UI/UX Intern — *6 Months, 2026*

- Designed UI/UX for websites and mobile apps, creating wireframes and prototypes in Figma.
- Built and customized websites using WordPress, aligning themes and layouts with design specifications.
- Developed cross-platform mobile app interfaces using Flutter, translating design mockups into functional screens.

Rasa AI Labs — Chennai
Data Science & AI Intern — *2024–2025*

- Contributed to real-time AI and data-driven projects, translating user requirements into functional interface and workflow decisions.
- Collaborated cross-functionally to align technical implementation with usability goals.

Remark Skill Education — Hyderabad (Online)
Data Science & Analytics Intern — *Apr–May 2025*

- Analyzed real-world datasets and built visual, easy-to-interpret reports for non-technical stakeholders.
- Applied data-interpretation insights to inform clearer, user-friendly presentation of findings.

Projects

School Website UI/UX Design | *Figma, HTML, CSS* — 2026

- Designed the complete UI/UX in Figma, from wireframes to a responsive high-fidelity prototype, for a multi-page school website.
- Created a consistent design system (typography, color palette, components) for a clean, accessible visual identity.
- Structured navigation and page layout around key user journeys for students, parents and staff.

CRM System, UI/UX Design | *Figma, Wireframing* — 2026

- Designed the UI/UX for a Customer Relationship Management system, including dashboards, lead tracking and contact management screens.
- Built low-fidelity wireframes through high-fidelity interactive prototypes to map key user flows.
- Prioritized usability and information hierarchy to help users manage customer data efficiently.

AI Cooking Assistant | *Python, NLU, gTTS, Deep Translator* — 2026

- Developed an AI-powered multilingual cooking assistant using Python to deliver personalized recipe recommendations and step-by-step cooking guidance.
- Implemented NLU-based intent recognition and entity extraction for accurate user interaction.
- Integrated voice interaction (gTTS) and Deep Translator to enhance accessibility and multilingual support.
- Enhanced user engagement through conversational AI and optimized NLP pipelines.
